

Aloye Computer Enterprises

History

Founded in 1998 by James M. Aloye, Aloye Computer Enterprises provides prompt, efficient, dependable solutions of the highest quality to area businesses and consumers alike. Our solutions can aid your organization in its quest to reduce costs and maximize productivity. Our “full service” technology capabilities, coupled with our experience is the reason why we are in the best position to provide your organization with solutions that are prompt, thorough, and comprehensive. When your organization demands the best, Demand Aloye Computer Enterprises.

Aloye Computer Enterprises

Mission

Aloye Computer Enterprises is relentless in its efforts to provide superior information technology services and unparalleled technical support to all of our corporate clientele. We believe that in the changing world of business, small and medium size companies can maximize their capabilities by utilizing the knowledge, experience, and “full service” technology resources of an experienced, local technology provider. Equipping your business to maximize the capabilities of high technology will increase your business’s potential to offer products and services, as well as extend the scope and range of customers that can be reached. **Since its inception in 1998**, Aloye Computer Enterprises mission has been to design, build, and support various types of technology and computer infrastructures that are in use today. We believe that business is about efficiency. Cost, Efficiency, and capabilities are contributors to the success of an enterprise.

Aloye Computer Enterprises mission is to empower our clients with a strong technology foundation. We know your mission is to succeed. Our tools will help you to do it.

IT's our Business!

Web Site Development, Hosting, and Maintenance

Does your organization want to reach out to potential clients by establishing a presence on the world wide web? Does your organization need a professional, high quality website designed to attract potential customers or to increase the ways your current clients communicate with your organization?

Aloye Computer Enterprises Comprehensive Web Site Solutions (ACE-WEBSOL) is exactly what your organization needs. We will develop and code your entire web site from the ground up, to deliver a professional looking web presence that is reflective of the strength, quality, and uniqueness of your organization. Reach out to potential customers, and enable your current clients with new ways to interact and communicate with your organization.

Software and System User Training

Would your organization benefit if system users gained an in depth understanding of new or current software applications? Would productivity increase if your users knew exactly what to do and how to do it?

If you answered yes to any of these questions, we urge you to inquire about our Software & System Training Services. Aloye Computer Enterprises Software & System Training Services (ACE-SSTS) will quickly and effectively train your users in the use of a variety of software applications as well as

knowing how to use and utilize the windows operating system. We offer training in all Microsoft Applications such as word, excel, access, as well as the Corel and Lotus application suites. Comprehensive Windows 95, 98, and 2000 training is also available. If your organization wants to empower your users with practical knowledge of software applications, interfaces, and operating systems, Aloye Computer Enterprises is your comprehensive computer training solution.

Computer Room & Computer Installation

Does your business, organization, or academic institution need a facility dedicated to computer usage or internet access? Are you looking for an experienced technology provider who understands the needs of growing businesses, organizations, and schools?

Aloye Computer Enterprises Computer Facility Installation Services (ACE-CFIS) is what your organization has been searching for. Our technology experts will handle the entire design, installation, and configuration of all hardware, software, and network related devices, allowing your organization to focus its efforts on what it does best.

If you already have a technology infrastructure in place, Aloye Computer Enterprises can integrate the functionality of your new facility into the framework of your existing system to ensure the continuation of overall compatibility and stability.

If your organization does not currently have a computer network, Aloye Computer Enterprises offers various types of network installation and configuration services. When combined with our network installation services, your organization will benefit from the expanded capabilities that result from having a computer network and computing facility. The features of your facility can include internet access, a uniform computing environment with the latest software applications, networked printers for centralized printing and a multitude of other benefits that go along with having a complete computing facility.

If your organization demands a dependable computing environment for academic learning or business productivity, call Aloye Computer Enterprises. We will meet and exceed the needs of your organization. When you are ready to establish a relationship with a technology solution provider, call Aloye Computer Enterprises.

Software Sales & Technology Deployment

Do you need a software application to empower or expand the capabilities of your organization? Does your growing business or organization need these software products deployed on all or several systems throughout your organization?

If you answered yes to any of these questions, then it is time to inquire about Aloye Computer Enterprises Software Sales & Deployment Services (ACE-SSDS). In addition to purchasing all of your required software applications and licensing directly through Aloye Computer Enterprises, we will work with you to plan and develop a software deployment and configuration strategy that will meet the timing and system configuration requirements of your organization.

Deployment Services Include:

- Comprehensive system analysis
- Analysis of potential compatibility or configuration issues
- Deployment plan and map
- Installation & configuration of software
- Troubleshooting possible configuration issues

When your organization needs a dependable software deployment solution, establish a relationship with Aloye Computer Enterprises. We will meet and exceed the needs of your organization.
